

ABOUT ME

Interdisciplinary professional with a BSc in Physics and an MBA, I am transitioning into software engineering and bring over five years of experience managing technical and administrative operations across construction, energy storage, solar energy, electric fencing, and plantation management to drive productivity and efficiency through technology and systems thinking. As I move toward a software developer role, I leverage a background in project management, operations, and entrepreneurship while building full-stack skills in Python, C, and web technologies (HTML, CSS, JavaScript) through Harvard CS50; I am known for strong problem-solving, delivering results under pressure, and a commitment to continuous learning, and I am eager to contribute to impactful software teams by building scalable, user-focused applications.
